

CAYQUE GASTÓN CICARELLI

Information Security Professional specializing in GRC and Risk Management |

Email: cayquecicarelli@gmail.com | Phone: +551191719-7472 | Location: São Paulo, SP, Brazil |

Portfolio: <https://neonbrasil.github.io/cayque/>

PROFESSIONAL SUMMARY

Security Analyst with a focus on GRC and Risk. Experience with NIST, ISO 27001, Splunk, and DLP. Researcher in Deepfake detection.

PROFESSIONAL EXPERIENCE

Information Security Analyst | Edenred Brazil

São Paulo, Brazil | March 2024 – December 2025

- Implemented risk treatment plans for data exfiltration, deploying a DLP (Proofpoint) solution to mitigate identified risks and reduce the probability of occurrence by more than 70%.
- Created and launched "PSD News," a weekly technical awareness program that strengthened the security culture and resulted in a reduction of more than 30% in related incidents.
- Successfully identified a critical data leak by analyzing subtle patterns in file transfer logs, preventing a large-scale security breach.
- Conducted incident response efforts using Splunk SIEM for data collection and real-time threat correlation, with Excel used for in-depth data analysis.
- Conducted security control assessments through gap analysis based on the NIST 800-53 and ISO 27001 frameworks, documenting deficiencies in the organization's risk register.
- Proactively identified emerging threats, combining automated monitoring (Axur platform) with in-depth manual OSINT investigations, using independent research techniques.
- Communicated the organization's risk posture to senior management, translating the results of technical assessments into business impact reports, and recommending prioritized risk treatment plans.

Ruby on Rails Developer | Sankhya Jiva

Brazil | August 2022 – May 2023

- Experience in the secure development and data integrity lifecycle of PostgreSQL.

ACADEMIC BACKGROUND

Bachelor's Degree in Computer Science FEI University Center, São Bernardo do Campo, Brazil.

Completion: December 2025

TECHNICAL SKILLS AND CERTIFICATIONS

GRC and Frameworks: NIST 800-53, ISO 27001, Risk Management, Controls Audit, Policy Development.

SIEM and Threat Intelligence: Splunk (Log Correlation), OSINT Investigation, Threat Analysis.

Data Protection Law (DLP): Proofpoint, Data Loss Prevention, Email Security.

Identity Management (IAM): Active Directory, Access Control and Permissions.

Offensive Security & Forensics: Digital Forensics, Network Fundamentals, TryHackMe.

Automation: Python (Scripting for Security).

Certification: CompTIA Security+ (In progress).
