

Cayque Gastón Cicarelli

Information Security Analyst | GRC • SOC • DLP • IAM

São Paulo, Brazil | +55 11 91719-7472 | cayquecicarelli@gmail.com

[linkedin.com/in/cayque-cicarelli](https://www.linkedin.com/in/cayque-cicarelli) | github.com/NeonBrasil | neonbrasil.github.io/cayque

Information Security professional with nearly 2 years of internship experience at Edenred Brasil (payments) in GRC (ISO 27001, NIST 800-53, and LGPD, Brazil's data protection law), DLP (Proofpoint), incident response, and security awareness. B.Sc. in Computer Science (FEI), fluent in English, with a focus on quality: clear documentation, traceable evidence, and continuous improvement.

Professional Experience

Information Security Intern — Edenred Brasil | São Paulo, Brazil | Mar 2024 – Dec 2025

- Administered and used Proofpoint DLP, performing about 90% of Edenred Brasil's analyses in the tool; took part in its implementation and in treatment plans against data exfiltration, reducing risk likelihood by over 70%.
- Worked on over 100 Proofpoint incidents, reporting the cases by email to managers and directors, who decided on penalties; in my analyses (Proofpoint and Splunk), checked whether emails violated the LGPD.
- Analyzed data in Splunk (SPL), identifying a critical data leak through patterns in transfer logs, which was then analyzed in Proofpoint.
- Analyzed, as a team and using OSINT, international cases flagged by Axur (social media profiles, fake, scam, or outdated websites, brand misuse) and wrote reports for takedown by Axur or in-house.
- Performed gap analyses (NIST 800-53, ISO 27001) and reported risks to senior management with treatment plans.
- Updated over 5 nationwide Information Security policies and supported access governance (IAM/Active Directory).
- Created Awareness & Tech News, weekly security news and awareness posts on the company's internal social network, with support from managers and directors, which reduced related incidents by over 30%.

Lead Developer – Python/Ren'Py (Freelance) — Letterflux Studios (US) | Remote | Mar 2026 – Present

- Lead the commercial game *A Week to Remember* (Steam and itch.io) in English with a US-based team, ensuring quality through technical documentation, Git, user testing, and Scrum.

Ruby on Rails Developer — Sankhya Jiva | Remote | Aug 2022 – May 2023

- Developed legacy systems using Ruby on Rails, Python, JavaScript, and PostgreSQL.

Projects

- **The New Year's School** (Godot, Steam): security testing of the multiplayer game, checking whether it was possible to hack the game to get its answers or to hack other players.
- **SIA – Security & Information Academy**: free cybersecurity learning platform, from beginner to advanced levels, which I created (cyberguard-pro-27c29.web.app).

Education & Certifications

B.Sc. in Computer Science — Centro Universitário FEI | Graduated: Dec 2025 | Capstone: AI algorithm to identify a specific type of deepfake

Introductory courses: Google, Cisco, Microsoft, and FGV • CompTIA Security+ (in preparation)

Technical Skills

- **GRC**: ISO 27001, NIST 800-53, LGPD, Risk Management, Gap Analysis, Information Security Policies.
- **SOC & Data**: DLP (Proofpoint), Splunk (SPL), Log Analysis, Incident Response, OSINT (Axur), IAM/Active Directory.
- **Development**: Python, SQL, PostgreSQL, Ruby on Rails, JavaScript, Git, Scrum.
- **Office**: Excel and PowerPoint, from reports for senior management and the team to data analysis.
- **Languages**: Portuguese (native), English (fluent, used daily at work), Spanish (intermediate).

Volunteering

- Free math and computer classes; support for families in vulnerable situations at São João Batista Parish. Author of *O Castelo da Imaginação* (2019), a fantasy novel for young readers.
